

*"Apollo"* Valves

**FLANGED SERIES Y-STRAINERS**

## Y-Strainers

### APOLLO® SERIES 125YF AND 250YF

### IRON PIPE FLANGED Y-STRAINERS

#### FEATURES

- Iron strainers are complete with Flat Face (Series 125YF) or Raised Face (Series 250YF) flanges in accordance with ASME B16.1.
- Strainer body meets applicable ASME Standard.
- One piece cast body.
- Strainers equipped with bolted cover flange that utilize a flat gasket seal.
- Low pressure drop.
- Upper and lower machined seats.
- 304 SS perforated screens are standard.
- Drain/Blow-off connection furnished with plug as standard.
- Generous screen area and properly proportioned straining chamber to minimize initial pressure drop while maximizing time between cleanings.
- Compact end to end dimension.

Upper Pressure Limits (Non-Shock)			
Apollo Model	Body Material	M.A.W.P. PSIG (Bars)	Ends
125YF (up to 12" size)	A126-B Cast iron	200 (13.79)	FF
125YF Sizes 14" and up)	A126-B Cast iron	150 (10.34)	FF
250YF (Sizes 2" - 12")	A395 Ductile iron	500 (34.47)	RF
Body Material		Lower Limit °F (°C)	
A126-B, A395		-20 (-28.9)	

Parts List and Standard Materials		
Part	Cast Iron	Ductile Iron
Apollo Model	125YF	250YF
Body	A126-B	A395
Cover	A126-B	A395
Screen <sup>1</sup>	304 SS	304 SS
Plug <sup>2</sup>	A126-B	A126-B
Gasket <sup>1</sup>	Graphite	Graphite
Bolt/Stud <sup>2</sup>	A307-B	A307-B
Nut <sup>2</sup>	A563	A563

#### Notes:

1. Recommended Spares.
2. Materials of equivalent strength may be substituted at manufacturer's option.

# Y-Strainers

## Engineering Data Screen Openings for Y-Strainers

### PURPOSE

If the basket strainer is being used for protection rather than direct filtration, Apollo's standard screens will suffice in most applications.

### SERVICE

With services that require extremely sturdy screens, such as high pressure/ temperature applications or services with high viscosities, Apollo® recommends that perforated screens without mesh liners be used. If mesh is required to obtain a certain level of filtration, then Apollo recommends a trapped perf./mesh/perf. combination.

### FILTRATION LEVEL

When choosing a perf. or a mesh/perf. combination attention should be given to ensure overstraining does not occur. As a general rule the specified level of filtration should be no smaller than half the size of the particle to be removed. If too fine a filtration is specified the pressure drop through the strainer will increase very rapidly, possibly causing damage to the basket.

### FACTORS TO CONSIDER

### SCREEN TYPES/DIMENSIONS

														
1/4" Dia. - 40% O.A.	3/16" Dia. - 50% O.A.	5/32" Dia. - 58% O.A.	1/8" Dia. - 40% O.A.	3/32" Dia. - 39% O.A.	1/16" Dia. - 37% O.A.	3/64" Dia. - 36% O.A.	1/32" Dia. - 40% O.A.	0.027" Dia. - 23% O.A.	20 Mesh - 49% O.A. 0.035" Openings	30 Mesh - 45% O.A. 0.022" Openings	40 Mesh - 41% O.A. 0.016" Openings	60 Mesh - 38% O.A. 0.010" Openings	80 Mesh - 36% O.A. 0.008" Openings	100 Mesh - 30% O.A. 0.006" Openings

#### Notes:

- Screen openings other than those shown above are available.
- Screens are available in a wide range of materials, CS, SST, Alloy 20, Monel 400, Hastalloy C and Titanium GR2.
- Custom manufactured screens are available upon request. Please consult factory.
- All mesh screens include liner;
  - .045 Perf      3" and smaller
  - .125 Perf      4" and larger.

Standard Screens	
Size Range	Opening
2" - 3"	0.045 in.
50mm - 80mm	1.2mm
4" and larger	0.125 in.
100mm and larger	3.2mm

## Engineering Data Y-Strainer Pressure Drop - Liquids

Figure 1

**Notes:**

1. Pressure drop curves are based on water flow with standard screens.
2. See next page for correction factors to be used with other fluids and/or screen openings.

The following optional features are available for most Apollo Y-Strainers. Please consult factory if required feature not shown.

FEATURES & AVAILABILITY	
Feature	Description of Availability
Screen openings	Range 5 micron to 1/2" perf.
Screen materials	Carbon steel, stainless steel (304/316 and L grades), alloy 20, monel 400, hastalloy C, Titanium, etc.
Screen construction	Perforated plate, mesh and wedge wire.
Gaskets	Any material commercially available.
Special body materials	Consult factory.
Special coatings	FDA Epoxy Coating
Silicon free contamination	Specially cleaned and packed - performed on request.
Canadian Registration (CRN)	Available on most models in province of installation.

**Note:**

1. Strainer size may effect the ability to apply certain coatings and linings.

### FOR NON-STANDARD AND MESH LINED SCREENS

\*Multiply values obtained from figure 1 thru 4 by the appropriate values shown below Chart #1

Size Range	SCREEN OPENINGS								
	Perforated Plate					Mesh lined standard screens			
	% Screen Material		Open Area			% Screen Material		Open Area	
	60%	50%	40%	30%	20%	50%	40%	30%	
2" - 16"	0.65	0.8	1	1.4	2.15	1.05	1.05	1.2	

#### Notes:

- See page 3 for % Open Area's of Apollo inventoried perforated plate.
- Standard screens for sizes 2" and larger is approximately a 40% open area screen media.
- All mesh screens include liner;
  - .045 Perf            3" and smaller
  - .125 Perf            4" and larger.

### EXAMPLE

- |  |  |
|--|--|
| Strainer Size: 2"<br>Filtration: 100 Mesh lined<br><br>Flow rate: 65 GPM<br>Service: Water | A) Using Figure 1 the pressure drop is determined to be 1.0 psid with Apollo's standard screen.<br>B) Looking at page 3 we find that the % open area of 100 mesh is 30%.<br>C) Using Chart #1 we read the correction factor to be 1.2 for 100 mesh lined .045" perf.<br>D) Total pressure drop equals $1.0 \times 1.2 = 1.2$ psid clean. |
|--|--|

### VISCOSITY AND DENSITY CORRECTION FACTOR CHART

Chart #2

Size Range	Component Factor (CF)
2" - 16"	0.35

Chart #3

Viscosity Cp	Body Loss Factor (BF)	Perf alone (PF)	Screen Loss Factor		
			20 Mesh Lined (MF)	30, 40, Mesh Lined (MF)	60 to 300 Mesh Lined (MF)
10	1	1.15	1.3	1.4	1.5
25	1.2	1.25	2	2.2	2.5
100	1.6	1.4	3	4	6.5
200	2.2	1.5	4.5	7	11.5
500	4.4	1.6	10	15	25
1000	8	1.7	15	30	50
2000	15.2	1.9	30	60	100

### HOW TO USE

- Using Figure 1 see page 4 determine the pressure drop (P1) through the strainer with water flow and standard screens.
- If non-standard screens (i.e. 40 mesh, etc.) are being used apply factors in Chart #1 to determine corrected pressure drop (P2).
- Multiply P1 or P2 (is used) by the specific gravity of the fluid actually flowing through the strainer to get P3.
- Using Chart #2 multiply P3 by the appropriate Component Factor (CF) to get P4.
- Let  $P5 = P3 - P4$ .
- Multiply P4 by the appropriate Body Loss Factor (BF) in Chart #3 to get P6.
- Multiply P5 by the appropriate Screen Loss factor (PF or MF) in Chart #3 to get P7.
- Total pressure drop  $P8 = P6 + P7$ .

### EXAMPLE

- |   |  |
|---|--|
| Strainer Size: 2"<br>Filtration: 100 Mesh lined<br>Flow rate: 65 GPM<br>Specific Gravity: 1<br>Viscosity: 25 cP | A) As shown in the above example, the corrected pressure drop (P2) = 1.2 psid<br>B) Since S.G. = 1, $P3 = P2 = 1.2$ psid<br>C) Using Chart #2 $P4 = 0.35 \times P3 = 0.42$ psid<br>D) $P5 = 1.2 - 0.4 = 0.8$ psid<br>E) Using Chart #3 $P6 = 0.4 \times 1.2 = 0.48$ psid<br>F) Again using Chart #3 $P7 = 0.8 \times 2.5 = 2.0$ psid<br>G) Total pressure drop $P8 = 0.48 + 2.0 = 2.48$ psid |
|---|--|

## Engineering Data Y-Strainer Pressure Drop - Saturated Steam

SIZES 2" - 16"

### Notes:

1. Pressure drop curve is based on saturated steam flow with standard screens. See page 5 for correction factors to be used with other screen openings.
2. Chart can be used for air and gas by using the following formula:

### WHERE

$$Q_s = 0.138 Q_g \sqrt{(460+t) \text{ s.g.}} \left\{ \frac{DP}{P_2} < 1.0 \right\}$$

FOR NON-CRITICAL FLOW

- Q<sub>s</sub> = Equivalent Steam Flow, lbs./hr.
- Q<sub>g</sub> = Air or gas flow, SCFM.
- t = Temperature, °F.
- s.g. = Specific gravity (s.g. = 1 for air)
- DP = Pressure Drop, psid
- P<sub>2</sub> = Outlet Pressure

### EXAMPLE

Service: Saturated Steam Flow  
 Pressure: 400 psig  
 Steam Flow: 90,000 Lbs/hr  
 Size: 8"

- Locate steam flow.
- Follow horizontal line to required pressure.
- Follow vertical line downwards to required strainer size.
- Follow horizontal line to read pressure drop.
- Pressure drop equals 2.0 psid.

## Check List and Suggested Specifications

### STRAINER CHECK LIST

When selecting a strainer, please take the factors listed below into account. This will assist us when recommending a strainer to suit your specific requirements. Please photocopy this page and fill out the pertinent information.

1. Fluid to be strained \_\_\_\_\_
2. Flow rate \_\_\_\_\_
3. Density of fluid \_\_\_\_\_
4. Viscosity of fluid \_\_\_\_\_
5. Fluid working pressure \_\_\_\_\_  
Maximum pressure \_\_\_\_\_
6. Fluid working temp. \_\_\_\_\_  
Maximum temp. \_\_\_\_\_
7. Preferred material of strainer construction \_\_\_\_\_  
\_\_\_\_\_
8. Present pipeline size & material \_\_\_\_\_
9. Nature of solids to be strained out \_\_\_\_\_
10. Size of solids to be strained out \_\_\_\_\_  
Size of mesh or perf. req. \_\_\_\_\_
11. Clearance Limitation Above \_\_\_\_\_ Below \_\_\_\_\_  
Left side facing inlet \_\_\_\_\_ Right side facing inlet \_\_\_\_\_
12. Maximum pressure drop with clean screen \_\_\_\_\_
13. Expected cleaning frequency \_\_\_\_\_
14. Any other information deemed relevant \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

### SUGGESTED SPECIFICATIONS

The strainer shall be a Y-Type and have \_\_\_\_\_ (size) inlet/outlet connections. The end connections shall be flanged and the body shall be complete with a bolted cover assembly. The strainer shall be suitable for \_\_\_\_\_ PSIG operating pressure at \_\_\_\_\_ °F operating temperature. The body shall be constructed of \_\_\_\_\_ (body material) while the screen shall be constructed of \_\_\_\_\_ (screen material). A mesh lining of \_\_\_\_\_ (size of mesh) is required, allowing a maximum pressure drop of \_\_\_\_\_ psig. The strainer shall be equipped with a \_\_\_\_\_ (gasket material) gasket and the strainer screen shall be able to withstand \_\_\_\_\_ psig differential pressure without any deformation. Strainers shall be Apollo Model # \_\_\_\_\_ or approved equivalent.

Name \_\_\_\_\_  
Company \_\_\_\_\_  
Address \_\_\_\_\_  
City/Town \_\_\_\_\_  
State \_\_\_\_\_ Zip Code \_\_\_\_\_  
Telephone ( \_\_\_\_\_ ) \_\_\_\_\_  
Fax ( \_\_\_\_\_ ) \_\_\_\_\_

## Installation and Maintenance Instructions

### 1.0 STRAINER INSTALLATION INSTRUCTIONS

- A. Ensure all machined surfaces are free of defects and that the inside of the strainer is free of foreign objects.
- B. For horizontal pipelines, the strainer should be installed so that the drain connection is pointed downwards.
- C. For flanged end strainers, the flange bolting should be tightened gradually in a back and forth clockwise motion.
- D. Once installed, increase line pressure gradually and check for leakage around joints.
- E. If the strainer is supplied with a start-up screen, monitor pressure drop carefully.

NOTE: Flat face mating flanges and full face gaskets must be used with 125YF series strainers to avoid damage to the cast iron body.

### IMPORTANT

Ultimate responsibility for strainer and material selection rests with the customer, as only the customer knows the particular use to which the strainer will be put and the exact operating parameters to which it will be subjected.

### 2.0 STRAINER REMOVAL INSTRUCTIONS

- A. Drain piping.
- B. Vent line to relieve pressure.
- C. Secure necessary lifting equipment to strainer assembly.
- D. Loosen flange bolts (Pipe flanges only).
- E. Remove inlet/outlet flange bolts and carefully remove strainer.

**CAUTION SHOULD BE TAKEN DUE TO POSSIBLE EMISSION OF PROCESS MATERIAL FROM PIPING. ALWAYS ENSURE NO LINE PRESSURE EXISTS WHEN OPENING COVER.**

### 3.0 MAINTENANCE INSTRUCTIONS

For maximum efficiency, determine the length of time it takes for the pressure drop to double that in the clean condition. Once the pressure drop reaches an unacceptable value, shut down line and follow the "Screen Replacement Instructions". A pressure gauge installed before and after the strainer in-line will indicate pressure loss due to clogging and may be used to determine when cleaning is required.

### 4.0 SCREEN REPLACEMENT

It is recommend that the system and strainer be depressurized before attempting any repair work. After removing all pressure, the system should be drained, any connections to the blow-off plug should be removed, and the following procedure should be used to replace the screen.

- A. Attach cable or chain to strainer cover (1) and apply sufficient tension to prevent cover from dropping.
- B. Remove bolts from cover.
- C. Remove cover, clean and inspect gasket surface of cover.
- D. Remove and discard old gasket.
- E. Remove and clean or discard old screen.

# Y-Strainers

- F. Clean and inspect gasket surface of body. If gasket surface of cover or body is damaged, the damaged component must be replaced.
- G. Push clean screen into position in body.
- H. Position new gasket in place on body.
- I. Line up screen and put cover in place on body.
- J. Be sure gasket, bolt holes, and screen are properly aligned.
- K. Put in bolts and nuts as required
- L. Tighten bolts, using "star" pattern to prevent damaging parts. Alternate tightening 180° apart. Tighten bolts sufficiently to stop leakage under test and service conditions.

## Installation and Maintenance Instructions (continued)

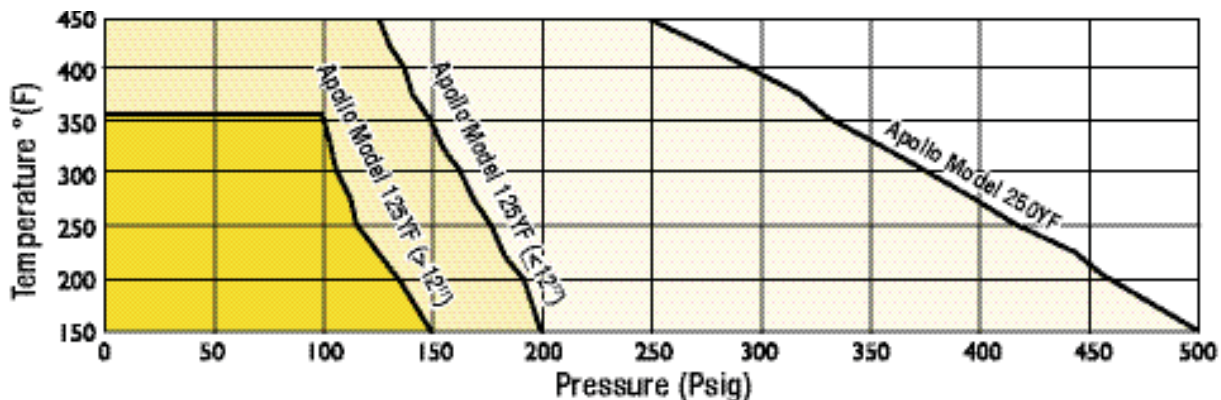

Series	Pipe Size (In.)	Std. Opening (in.)	Nominal Area of Pipe Fitting (Sq. In.)	Gross Screen Area (Sq. In.)	Free Area (Sq. In.)	Ratio Free Area to Pipe Area

125YF	12	0.125	113.10	665.77	266.31	2.35
125YF	14	0.125	137.89	1186.34	474.54	3.44
125YF	16	0.125	182.65	1446.85	578.74	3.17
250YF	2	0.045	3.14	35.64	12.83	4.08
250YF	2 1/2	0.045	4.91	44.33	15.96	3.25
250YF	3	0.045	7.07	56.45	20.32	2.88
250YF	4	0.125	12.57	98.91	39.56	3.15
250YF	5	0.125	19.63	147.11	58.85	3.00
250YF	6	0.125	28.27	197.92	79.17	2.80
250YF	8	0.125	50.27	420.97	168.39	3.35
250YF	10	0.125	78.54	645.99	258.40	3.29
250YF	12	0.125	113.10	876.70	350.68	3.10
250YF	14	0.125	137.89	1186.34	474.54	3.44

**Notes:**

- 1. Values shown are for strainers with standard screens.
- 2. Ratio Free Area to Pipe Area may be increased by changing perf. stagger or by using mesh.
- 3. In many cases the specified screen burst pressure limits the maximum value for the Ratio Free Area to Pipe Area.

## Terms and Condition of Sale

Payment: 2% 10th prox. Net 30 days. All prices F.O.B. Matthews, N.C., or Pageland, S.C., with freight allowed on shipments of 750 pounds or \$4,000 net and over to all shipping points within the United States excluding Alaska and Hawaii. No freight allowed on Air Freight or Parcel Post shipments. Claims for shortages must be made within 10 days of receipt of material. Our responsibility ends when a receipt is furnished us by the carrier.

No Invoice Rendered For Less Than \$50.00. No freight will be allowed on Air Freight, Air Express, Parcel Post or U.P.S. shipments. Other Conbraco Products may be combined to make sufficient weight for full freight allowance. Phone order quoted prices are subject to correction. Prices and designs are subject to change without notice. Orders for material or special design or specification are made to customer's order and are not subject to cancellation or return. Goods returned to us will not be accepted unless a full explanation has been made and our written authorized permission obtained. All goods returned – if accepted – will be credited at invoice price, less 30% for service and rehandling charges, plus shipping expenses. We reserve the right to adjust orders to box quantities.

## Warranty and Limitations of Liability

Conbraco Industries, Inc. warrants, to its initial purchaser only, that its products which are delivered to this initial purchaser will be of the kind described in the order or price list and will be free of defects in workmanship or material for a period of one year from the date of delivery to you, our initial purchaser.

Should any failure to conform to this warranty appear within one year after the date of the initial delivery to our initial purchaser, Conbraco will, upon written notification thereof and substantiation that the goods have been stored, installed, maintained and operated in accordance with Conbraco's recommendations and standard industry practice, correct such defects by suitable repair or replacement at Conbraco's own expense.

THIS WARRANTY IS EXCLUSIVE AND IS IN LIEU OF ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR OTHER WARRANTY, WHETHER EXPRESS OR IMPLIED, EXCEPT THE WARRANTY OF TITLE AND AGAINST PATENT INFRINGEMENT. Correction of non-conformities, in the manner and for the period of time provided above, shall constitute fulfillment of all liabilities of Conbraco to our initial purchaser, with respect to the goods, whether based on contract, negligence, strict tort or otherwise. It is the intention of Conbraco Industries, Inc. that no warranty of any kind, whether express or implied shall pass through our initial purchaser to any other person or corporation.

LIMITATION OF LIABILITY: Conbraco Industries, Inc. SHALL NOT UNDER ANY CIRCUMSTANCES BE LIABLE FOR SPECIAL OR CONSEQUENTIAL DAMAGES SUCH AS, BUT NOT LIMITED TO, DAMAGE TO LOSS OF OTHER PROPERTY OR EQUIPMENT, LOSS OF PROFITS OR REVENUE, COST OF CAPITAL, COST OF PURCHASED OR REPLACEMENT GOODS, OR CLAIMS OF CUSTOMERS OF OUR INITIAL PURCHASER. THE REMEDIES OF OUR INITIAL PURCHASER, AND ALL OTHERS, SET FORTH HEREIN, ARE EXCLUSIVE, AND THE LIABILITY OF CONBRACO WITH RESPECT TO SAME SHALL NOT, EXCEPT AS EXPRESSLY PROVIDED HEREIN, EXCEED THE PRICE OF THE CONBRACO GOODS UPON WHICH SUCH LIABILITY IS BASED.
