To: Our Valued Customers  
Date: September 21, 2009  
Subject: **Lead – Free\* Products**

Apollo Valves is pleased to announce the introduction of our **Lead-Free\*** product line.

Our **Lead-Free\*** valves are in full production at our South Carolina foundry and have been approved by an ANSI certified third-party approval agency using the latest DTSC (California's Department of Toxic Substances Control) test protocol.

This will allow for a **Lead-Free\*** AMERICAN-MADE option for our most popular items typically used on potable water service. Our industry leading 5-Year Warranty applies.

We will begin to accept orders on initial phase products on September 28th, 2009. We will allow a one-time return of standard bronze products, providing that they are in resalable condition and meet our return policy requirements, with an equivalent/mirror quantities order of **Lead-Free\*** products (utilizing current LF list prices) Please contact your local Apollo sales representative to coordinate this return.

The first phase of this product introduction is limited to our 77CLF and 70LF **Lead Free\*** bronze ball valves.

- *The above valves meet the California AB 1953, Vermont S.152 and NSF/ANSI 61 – 8 2008 standards.*

We will then begin to roll out additional products over the next several weeks. We are attaching submittal and list price sheets for your convenience. In addition, all of these documents will be available to download from our website – [www.apollovalves.com](http://www.apollovalves.com)

If you have any questions please do not hesitate to contact our Technical Services Department at 704-841-6000 and/or visit the **Lead-Free\*** section of our website.

We thank you for your continued support of Apollo Valve products.

Sincere Regards,

Tony Favilla  
Vice President -Sales & Marketing N.A.

*\* The California Health & Safety Code, Section 116875, refers to "lead free" as the weighted average lead content of the wetted surface area of not more than 0.25%.*
